

Tony Stays at Home

By
Valerie Sheehan

Tony wakes up and opens his eyes, he goes to the window and looks up to the skies.

Everything looks the same, so it's hard to understand, why they can no longer do, all the things they had planned.

Mum explains to Tony about a virus called corona, it has travelled all around the world from China to Arizona.

We want it to go, and thats for sure, as it stands now, we are its biggest cure.

The whole world has a task ahead, to stay at home, take some extra time in bed.

Dad says we can play games, and learn to bake a cake, we will do some art, imagine all the cool things we could make.

Tony thinks of his friends, Ciara, Michael and Grace, along with Pippa, Evie and Sonny, it puts a smile on his face.

He knows they are at home, missing him too, and all the things they like to do.

Mum says Tony, It will all be ok, and fingers crossed we will be back to school in May.

Until then, we can call our friends on the phone, or write them a letter so we don't feel alone.

We can still go out for a walk down our street, but we say hello, from a distance to the people we meet.

When we come home we must wash our hands, then we can take a look at our new dayplans..

This might seem scary because it's all new, but we will be fine, I promise this is true.

There might be no playground or McDonalds for chips, but it wont be long until we are back, going out on trips.

So let's remember how we can do our bit, so we can finally get this virus to quit.
We must wash our hands, and stay at home, keep our distance from others when we go for a roam.
Once we do all that, and stick with the plan...

Then... can we go outside again.?

Yes we can...
